

Reach Statement for EU Regulation No 1907/2006 on the Registration, Evaluation, Authorisation of Chemicals

REACH Article 6 requires manufacturers and importers to register with the European Chemical Agency any substances on their own, or in preparations that they produce or import in quantities over 1 tonne per year.

Martindale as a producer of articles, does not manufacture or import substances or preparations. We therefore have no registration obligations for substances or preparations within the current regulations.

Reach Article 7 (1) requires registration of any substance present in articles in quantities totaling over 1 tonne per year and intended to be released under normal conditions of use.

Martindale has no products that meet these article substance registration requirements.

REACH Article 33 requires suppliers of articles to inform their customers of the presence in the article of substances of very high concern (SVHC) included in the candidate list (REACH Article 59) above a concentration of 0.1% weight by weight. so that information to allow safe use can be provided.

Martindale can confirm that none of its products or packaging contain substances exceeding the 0.1% concentration threshold (see annex 1 for current list of substances).

We will continue to actively monitor the candidate list for additions and should it be necessary, we will provide safety information to our customers at the earliest opportunity.
