

Key features LOKKITDOM:

- Designed for use on domestic distribution boards
- Includes all key items needed for installers to safely lock-off

Features LOK15:

- Suitable for where access is restricted
- Pushpin design with 15mm spacing.

Features LOK2:

- Fits a wide range of MCBs, RCBOs, fuse carriers and main switches
- 8 mm opening

LOKKITDOM Domestic Installer lock off kit is designed to help installers safely lock off while work is undertaken. The kit comprises of a set of key items for use when working on domestic electrical systems.

Martindale's LOK2 and LOK15 Isolation locks are ideal for use on domestic distribution boards for safe isolation purposes. The LOK15 is used where access is restricted, it features a pushpin design with 15mm spacing for use with MCBs. The LOK2 is a standard MCB lock with an 8mm opening.

The TAG6 is a durable laminated tag 80 x140mm which can be secured using a padlock through the brass eyelet it gives a highly visible warning to others that an engineer has isolated and locked off a circuit.

Erasable information can be written on the tag using the LOKMP marker pen. The lock and tag can be secured using the PAD11RD padlock with a unique key.

Keeping You Safe

LOKKITDOM

Domestic lock out kit

Martindale LOK2 - MCB Yellow Isolation Lock

The MARLOK2 dimensions are 44mm x 14mm. It has an 8 mm opening which is 7mm deep. A 'DO NOT REMOVE LOCKED OUT' label is attached to the device so that it is easily visible when in use.

Martindale LOK15 MCB Isolation Lock

The MARLOK15 dimensions of the main body are 40mm x 18mm. The pushpin design has a 15mm spacing and easy to fit by simply depressing the spring loaded actuator to bring the pins closer together. The pins are designed to locate in the recesses in the middle of the MCB.

Martindale PAD11RD - Red Padlock

The PAD11RD is a Red Plastic bodied padlock with a 6mm strong steel shackle, designed for use with Martindale lockout devices and compatible with most other safety lockout products. The lock is supplied with a single key under Safe Isolation Procedure recommendations.

Martindale TAG6 - Safety Lock off Tag

The Martindale TAG6 Tags give a highly visible warning to others that an engineer has isolated and locked off a circuit or equipment for safety and extreme caution should be observed, they give a clear "Do Not Switch On" Instruction. The Tags also incorporate a highly visible and recognisable yellow warning triangle.

Martindale LOKMP – Marker pen

Using the marker pen, the name of the engineer, department and expected completion time and date can be written on the tag.

Martindale TC55 - Soft Carry Case

Made from robust heavy denier nylon with a zip opening and 190 x 88 x 55mm in size and a useful belt loop.
